Non-GAAP Definition

The India Supreme Court Decision Impact. In March 2021, the India Supreme Court issued a decision on withholding taxes in the case of Engineering Analysis Centre of Excellence Private Limited vs The Commissioner of Income Tax. Microsoft has historically paid India withholding taxes on software sales through distributor withholding and tax audit assessments in India. The India Supreme Court ruled favorably for companies in 86 separate appeals, some dating back to 2012, holding that software sales are not subject to India withholding taxes. Although Microsoft was not a party to the appeals, Microsoft's software sales in India were determined to be not subject to withholding taxes. Therefore, Microsoft recorded a net income tax benefit of \$620 million in the third quarter of fiscal year 2021 to reflect the results of the India Supreme Court decision impacting fiscal year 1996 through fiscal year 2016.

Microsoft has provided non-GAAP financial measures related to the India Supreme Court decision to aid investors in better understanding our performance. Microsoft believes these non-GAAP measures assist investors by providing additional insight into its operational performance and help clarify trends affecting its business. For comparability of reporting, management considers non-GAAP measures in conjunction with GAAP financial results in evaluating business performance. The non-GAAP financial measures presented in this release should not be considered as a substitute for, or superior to, the measures of financial performance prepared in accordance with GAAP.

Constant Currency

Microsoft presents constant currency information to provide a framework for assessing how our underlying businesses performed excluding the effect of foreign currency rate fluctuations. To present this information, current and comparative prior period results for entities reporting in currencies other than United States dollars are converted into United States dollars using the average exchange rates from the comparative period rather than the actual exchange rates in effect during the respective periods. All growth comparisons relate to the corresponding period in the last fiscal year. Microsoft has provided this non-GAAP financial information to aid investors in better understanding our performance. The non-GAAP financial measures presented in this release should not be considered as a substitute for, or superior to, the measures of financial performance prepared in accordance with GAAP.
